

There has not been sufficient public notice of the changes proposed in this Docket - 02-277. Since the networks and media do not want me to know about what they seek, there are not informing me, nor making sufficient public comment on their goals. As a consequence I (and the public) have no real knowledge of the proposals to consolidate broadcast ownership. I for one feel any more consolidation would be detrimental to my access to information. The airways belong to the public and I feel any consolidation would perpetrate abuse of the free airways. Please do not allow any further consolidation; the long standing rules are designed to protect me and I don not want them changed.
